MIXING VALVE SERIES 4F

4F, DN 32-150, cast iron, PN 6. Flange.

OPERATION

The ESBE series F is a valve made of cast iron for use in heating and cooling installations.

The mixing proportions are adjusted manually with a handle or, in automatically controlled systems, by means of an actuator. Suitable actuators are ESBE series ARC300, ARD100, ARD200 or series 90. The valve can also be equipped with ESBE controllers series CRA120.

Valve series 4F is available in dimensions DN 32-150 with flanged connections.

The scale is graded on both sides and can be turned, allowing a choice of mounting positions. Operation angle = 90°.

SERVICE AND MAINTENANCE

All major parts are replaceable. The shaft seal consist two o-rings, one of which can be replaced without the need for draining down the system or dismantling the valve. However, before doing so, the system must be depressurized.

INSTALLATION EXAMPLES

All the examples of installations can be reversed. The valve position plate is graded on both sides and should at the installation be fitted in the correct position as shown in the instruction for installation.

VALVE 4F DESIGNED FOR

Heating

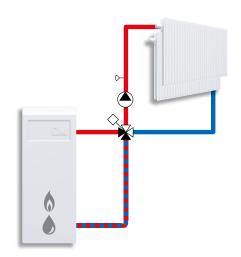

Comfort cooling

■ Series CRA120 ≤DN100

SUITABLE ACTUATORS AND CONTROLLERS

- Series 90 ≤DN100
- Series ARC300
- Series ARD100 ≤DN80
- Series ARD200

^{*} Kvs-value in m³/h at a pressure drop of 1 bar. Flow chart, see product catalogue.

SELECTION GUIDE ESBE ACTUATORS

The figures below are intended only as a recommendation for ordinary installations. In some applications the valve may require even more actuator torque.

	MA	XIMUM D	FFERENTI	AL PRESSI	JRE	MAXIMUM FLOW					
Actuator							٥٥				
_	ARA600	90	ARC300	ARD100	ARD200	ARA600	90	ARC300	ARD100	ARD200

MIXING VALVE

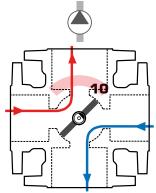

SERIES 4F

VALVE CHARACTERISTICS

MIXING VALVE SERIES 4F

DIMENSIONING

HEATING SYSTEMS (RADIATOR OR UNDERFLOOR HEATING SYSTEMS)

Start with the heat demand in kW (e.g. 200 kW) and move vertically to the chosen Δt (e.g. 10°C).

Move horizontally to the shaded field (pressure drop of 3-15 kPa) and select the smaller Kvs-value (e.g. 60). A mixing valve with suitable Kvs-value will be found in respective product description.

OTHER APPLICATIONS

Make sure maximum ΔP is not exceeded (see lines A to E in the graphs below).
