

ACTUATOR SERIES 90 2-POINT

ESBE actuator Series 90 for operating ESBE mixing valves DN 15–150. This series is provided with adjustable cam discs to obtain an operating range 30°–180° which make the series very flexible.

OPERATION

The ESBE series 90 actuator is a compact actuator for operating rotary mixing valves. The actuator is reversible and is provided with limit switches which are actuated by cam discs. By adjusting the cam discs an operating range from 30° to 180° can be obtained. The actuator is provided with a disconnection for manual operation and has an indication on the front showing valve position.

The 2-point signal control actuator is available for 230 V, 50 Hz with different running times as shown in the table.

An 2-point signal control actuator with built-in relay should be selected when the actuator is to be controlled by an on/off-thermostat.

OPTIONS

Art. No. 98100690 _____ Separate auxiliary switch

1 To operate the valve manually, push the button and use the lever. The electric current is automatically disconnected as long as the button is in the lower position.

2 Turn the valve to the desired position.

3 To return to automatic operation, bring the lever to the position where it locks, and the button returns to the upper position. The current supply is now connected.
