

Packaged Plant Rooms, Skids and Prefab Utility Cupboards

For Heat Networks and Commercial Buildings

Overview

We provide engineered offsite heating, hot water and electrical prefabricated solutions to suit your requirements and budget.

Our engineers understand the pressures faced when working on site and have successfully project managed many builds to tight schedules. You can rely on us to help you do a good job for your customer.

DESIGN

Our skilled engineers design packaged plant or prefabricated cupboards to your project specification.

BUILD

Products are built from scratch in our dedicated warehouse space to a high standard.

DELIVER

Located in Cwmbran, South Wales, Essco Prefab has excellent access to the motorway network. Our project team will work with you to meet your installation schedule.

Nothing substandard leaves the Essco shop. That's our promise.

FEATURES & BENEFITS

- Offsite prefabrication saves time and reduces project costs
- Expensive equipment stays off site making it less vulnerable to theft
- Simplifies logistics and project management
